the cumulative impacts paragraph isn't complete, focuses on the impact of past actions and does not mention the requirement to estimate the aggregate impact of reasonably foreseeable future actions and the conditional sentence addressing corps adoption of the EIS could be more clear/straight forward.

Any other surprises (other than not taking out that weird language, whatever it means)?

Thanks for turning it around again so quickly and sharing the final version with us. Have a good vacation and we'll see you in August.

Erin

Here's our final version. Only change suggested that we didn't make is we still left in the march and may agreements, mainly because we would prefer them described in EIS so there's no secrets in the processing of the applications.

Thanks

Hi Mike,

Thank you for sending the white paper to us for review & comment. The document seems to outline process points and when we get to specifics it would be good to discuss some pieces of it more precisely.

I made some comments in red-line strikeout and they are attached. Let me know if you have any questions or what to discuss any of them. I'm working until 2 today and until 2 tomorrow.

Thanks again!

Erin

My apologies. I neglected to use track changes. If you want to see my proposed changes just compare the documents. Overall I thought it was good but there seems to be a few more things for us to include for our needs.

Take all my suggested changes with a grain of salt.
